- BPM Workflow engine DevOps Training

## Advantages

- Easy cloud process modelling
- Human and machine readable processes
- Creation of sustainable values
- High performance and scalability
- Cost reduction & efficiency improvement
- Fast integration time

## About Camunda

Camunda revolutionizes process automation with a friendly approach to developers. Camunda masters this by providing easy to grasp and scalable tools to drive collaborations between the business and new process discoveries.

### Modelling

Businesses, as well as IT, can easily be modeled in workflows and DMN decision tables.

### Execute

Designed process models and decision tables are executed by the workflow engine increasing operation productivity.

### Optimize

Enhanced productivity is assured by real time visualization of KPI's, ongoing benchmarking and guaranteed process conformity.
